Grade 2 science worksheets insects

Click a worksheet in the list below to see more information or download the PDF. There are millions of types of insects, the most diverse group of animals on the planet, and they live in almost every environment, from rainforests to oceans. Insects are interesting, in part because their young look completely different from adults. Most insects undergo a transformation of three or four whole eggs into adults. All insects have some common features: six legs, antennae and a body divided into three parts: the head, the thorax and the abdomen. Many insects have wings. With more than 18,000 types of butterflies and about 400,000 types of beetles, insects have more members than any other animal group. Read about this interesting and diverse group of animals, and have fun with our insect puzzles and activities. Insect Count Numbers 6 – 10 Worksheet \$1.99 View Resource Worm Song Reading Understanding Worksheet \$1.99 Watch Resource Butterflies Reading Worksheet Understanding \$1.99 View Insect Resource and Worksheet Foot Sheet \$6 Download Free Printable Scientific Worksheets for Grade 2 Kids.
